

Heavy Duty Rotary Cutters

Constructed for heavy-duty applications, these rotary mowers feature 90 HP gearboxes, 7 gauge steel decks and 2" x 3" tubular steel reinforcement bracing. Standard slip clutch driveline protection and heavy-duty stump jumpers make the Taylor-Way 270 Series well suited for clearing brush up to 2" in diameter. The easy cleaning top-deck of the 270 Series protects your investment by reducing the corrosive build-up of trash and cut material on your machine.
